

**Your Mission is to keep safe and plan your photo-shoots**

### Safety

Safety in photography is always important, just a few tips to make sure you have a hassle free photo-shoot;

- If you can take someone with you
- Make sure you have a fully charged mobile phone
- Use extreme caution
- Think about what you're taking a photo of
- Plan your trip prior to leaving
- Consider that entering a vacant building i.e. abandoned house is considered trespassing.
- Be careful of traffic/where you're walking while you have a camera on your face, it's always easy to get caught up in the moment

No matter how good the shot may be, your safety is more important. Don't put yourself at risk of injury just for a 'could be great' photo.
